

**NETA 2008**

## **Clicker Presentations**

**Thursday 10:15-11:15 Breakout Session, Palace D**

### **Have You Used "Clickers" Yet???**

**Presenters:** Mary Moser, Pawnee City Public School; Kirsten Smith, Pound MS, Lincoln Public Schools; and Joan Christen, Beatrice HS

These great teachers will present how versatile the Classroom Performance System is and how it can be adapted to any classroom. They'll show you how easily the CPS system can be used in the classroom to access everyday learning. You'll see how CPS can also be used to do summative assessment directed toward standard tracking, unit tests with Exam View Pro, and how to use the CPS for PowerPoint to integrate questions right into your existing PowerPoint presentations.

**Thursday 2:00-3:00 Breakout Session, Palace B**

### **Clickers and Smart Boards in the Middle School Math Classroom**

**Presenters:** Nancy Pietzyk, Waverly MS; Phyllis Severson, Exeter-Milligan HS; and Michelle Looky, Seward MS

These ESU #6 Learning Web Team Participants will demonstrate the use of CPS clickers, CPS chalkboards, and SMART boards in the middle school math classroom. Teachers will demonstrate numerical entry options on the newer clicker models, show how to use clickers for "on the fly" formative assessments, and demonstrate the use of the CPS chalkboard in conjunction with clicker technology. Come try out the clickers!

**Friday 12:45-1:45 Breakout Session, Salon C**

### **Clickers - How Did I Ever Teach Without You?**

**Presenter:** Dustin Frank, eInstruction

Do your students seem different than 20, 10 or even 5 years ago? Imagine a class where all students are actively engaged and enjoying learning. Experience how CPS is used to stimulate student involvement on daily formative assessments. CPS will collect and disaggregate data on district benchmark assessments in real time. Stop by and see why Nebraska schools are using CPS. Don't miss your chance to win your very own set to take home!

**Friday 1:00-3:15 Workshop F23, Salon B**

### **Clickin' the Day Away**

**Presenter:** Melissa Simons, Elkhorn HS

Sure, your students are "plugged" into their iPods and "composing" their latest text message, but how do you "plug" them into learning in the classroom? Join Melissa, a high school English teacher, as you click your way through the basics of eInstruction's Classroom Performance System (CPS). In this workshop, you'll explore both teacher-led activities and the student assessment activities. Engagement is half of the equation as you'll also discuss the use of data to inform, change, or lead your instruction in new ways. Whether your students are elementary, middle school, high school, or college, Classroom Performance System (CPS) and the "clickers" will motivate your students to engage in the classroom. (Mac)

**Friday 3:15-4:15 Breakout Session, Palace G**

### **Clicker Innovations**

**Presenters:** Annette Coon & Derek Gangwish, Hillrise Elementary, Elkhorn Public Schools

What better way to excite students than to tell them to put away the pencils and paper because we are going to use the clickers instead!! This presentation will show how clickers can be used in the classroom in a variety of ways to enhance student learning. Annette and Derek will demonstrate how quick and easy it is to create and give review for tests, take tests, or complete daily work using clickers. They will also show how to get instant grades/reports.

Engaging Technologies...Educating a New Generation
